

Wheatstone Project Update:

November 1, 2013

Micro-tunnel Boring

- In August, boring of the .75-mile (1.2-km) micro-tunnel began at the shore crossing. Micro-tunnelling is being used to bring the 44-inch trunk line ashore.

Micro-tunnel Boring

- Inside the micro-tunnel launch pit, workers complete a push of the concrete jacking pipes. More than 400 pipes are pushed together to provide a conduit to pull the trunk line.

LNG Plant Site

- Construction works at the LNG plant site are progressing, with key areas now taking shape.

LNG Plant Site

- At the LNG plant site, fill is being brought from nearby borrow pits to raise the site level and piling is underway for the foundations of LNG Train 1.

LNG Tank Pad

- Piling works for the foundations of the two LNG storage tanks is underway.

LNG Plant Site Foundations

- Piling for the foundations of LNG Train 1 nears completion as construction of the refrigeration compressor foundation commences. More than 4,000 piles have been installed on site to date.

LNG Plant Site Marine Facilities

- At the Material Offloading Facility (MOF), the east quay piling platform and rock works for the temporary jetty are both complete.

LNG Plant Site Marine Facilities

- Installation of the abutment wall for the Product Loading Facility (PLF) is underway. The wall will anchor the shore end of the PLF.

Platform Construction

- At the DSME shipyard in Okpo, Korea, the intermediate deck is now fully installed and erection of the top deck has commenced.

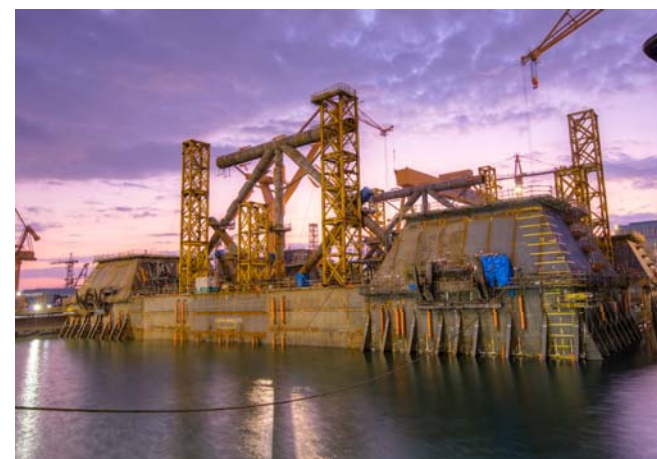

Platform Construction

- At the DSME shipyard in Okpo, Korea, erection of the steel gravity structure (SGS) pontoon and node blocks is nearing completion.

Platform Construction

Construction Workforce Accommodation Facilities

- With the first phases complete, more than 3,000 workers are now housed onsite.

Construction Workforce Accommodation Facilities

- At the Construction Village, the new kitchen and western diner facilities are operating, while the eastern diner nears completion.

Social Infrastructure

- The Chevron-funded 1.2-mile (1,900-meter) runway at Onslow airport is now operational and construction of a new terminal is well underway.

Social Infrastructure

- The Chevron-funded upgrade to Four Mile Creek picnic and fishing area is nearing completion.
